Z Holdings Corporation is the Dow Jones Sustainability Indices (DJSI) Industry Leader*, based on its S&P Global ESG Score as of 13 Nov 2020. This report provides an overview of the performance of the Interactive Media, Services & Home Entertainment industry and the relative positioning of Z Holdings Corporation at the dimension and criteria level.

Industry Drivers

This industry includes companies producing and distributing digital content and generating revenues via advertising on social media, search engines, and review portals. A distinctive characteristic of the industry is the ability of audiences to simultaneously be the consumer, the product, and the content creator. Increasing regulation and customer demand for greater transparency on storage and utilization of personal information are bringing data privacy issues into the spotlight. Innovation around customer acquisition and experience demands a highly technical and creative skill set, especially in the field of gaming applications. Visually-focused media is increasingly mobile based, with freemium business models emerging to combine entertainment, social media, and e-commerce in order to reach untapped audiences. Regulatory changes regarding consumer and data protection, content limitations, privacy, network security, encryption, antitrust, taxation, and payment laws will continue to challenge the industry, especially since different jurisdictions may choose to follow divergent paths.

Company Performance

S&P Global has selected the most relevant criteria in each sustainability dimension based on their weight in the assessment and their current or expected significance for the industry. The spider chart below visualizes the performance of the industry leader against the best score achieved in each criterion and the average industry score.

Corporate Sustainability Assessment

The Corporate Sustainability Assessment (CSA) is a comprehensive annual evaluation of companies' sustainability practices and performance, with a coverage of over 7,300 companies representing approximately 95% of global market capitalization. The CSA is one of the longest standing ESG rating methodologies worldwide, dating back to 1999. The CSA assesses companies on the basis of 80–120 industry-specific questions across 61 industries. S&P Global ESG Scores, calculated from the CSA, are from 1 to 100 (best).

In SustainAbility’s Rate the Raters 2019 report, companies rated the CSA as the most useful ESG assessment thanks to its high level of transparency, its sector-specific view of material ESG issues, and its forward-looking incorporation of emerging sustainability risks and opportunities. In the 2020 report, which looked at the investor perspective, the CSA came out top among the highest-quality ratings and was cited as a “strong signal of sustainability.”

The CSA focuses on financially material economic, environmental, and social factors that are relevant to companies’ success, but that are underresearched in conventional financial analysis. Every year, the CSA undergoes rigorous methodological review in order to ensure that the most current material sustainability topics, as well as emerging, longterm sustainability themes often of interest to investors are reflected, and companies are challenged on topics that lack disclosure today.

As of January 2020 the CSA is issued by S&P Global, where it forms the foundation of company ESG disclosure to S&P Global for financially material ESG factors and will underpin the ESG research across our different divisions (S&P Global Ratings, S&P Dow Jones Indices and S&P Global Market Intelligence).

For over 20 years the results of the CSA are used for the annual rebalancing of the iconic Dow Jones Sustainability Indices (DJSI). CSA scores are used in numerous other S&P Dow Jones indices including the S&P 500 ESG.

S&P Global ESG Scores are made available to the global Financial markets via S&P Global Market Intelligence platforms, robustly linked to financial and industry data, research and news, providing integral ESG intelligence to make business and financial decisions with conviction.

Companies’ data and benchmarks from the CSA can now feed seamlessly into the analysis for S&P Global Ratings ESG Evaluation should companies want a forward-looking long-term opinion of their ability to handle future risk and opportunities.
